| <ul style="list-style-type: none">• 300 CFM, 97.3 H2O, 14-Gallon, 120 Volt, 17.5A• Size: 36.0"(h) x 22.00"(w) x 26.00(l)• Weight: 63.0 lbs., Hose: 1-3/8" x 16'• Wheeled metal frame with easy dump (left), metal casters, height-adjustable push handle• Wet/dry operation with a water-level sensor and drain hose. | <ul style="list-style-type: none">• Adjustable CFM Speed Control• Fleece Primary Filter Bag (1)• HEPA Filter, Automatic Reverse Pulse Filter Clean - operates every 15 seconds to purge dust and debris from the HEPA filter• 2-3/8" Inlet Port to accept a 2" Hose• 1- Year Labor & Parts Warranty. |
|---|--|

** \$291.00 — Upgrade Package:

- (10) Air Pulse Filter Bags - keeps the HEPA filter clean, #136514
- 2" x 25' Crushproof Z-Vac Hose with (2) 2" ID Smooth Hose Cuffs
- see "Benefits of Upgrade Package"

** Benefits of Upgrade Package: Increase Vac Performance & Motor Life — Upgrades include:

1. **(10) Air Pulse Filter Collect Bag** - Provides far superior airflow vs. Bosch's fleece bag: prevents suction drop, larger collection yields, incredible durability — bag will not tear plus it keeps the HEPA filter clean.
2. **2" x 25' Crushproof Z-Vac Hose with Screw-On 2" Hose Cuffs (2)** - 2" hose improves vac performance & motor life vs. the included 1-1/4" hose which restricts airflow and increases amp draw. The 2" cuffs are identical, use one for the inlet port, the other connects to a 2" OD dust port.
