# Pump-Out / Squeegee Vac

Slurry Extraction • Flood Water Reclamation  
Debris & Wastewater Separation  
Water Recycling System for Power Tools

Powerful Suction with Internal Sump Pump ~ Tank is Instantly Emptied, Select Auto or Manual Discharge.

Tank is extremely easy to turn, maneuver, transport, & empty.

## Perfect Size, Performance & Design for Concrete Slurry

### Outperforms conventional shop vacuums 5:1

- **Production Rates:** 3 hours using a conventional shop vacuum vs. 30 minutes using the 4520P Pump-Out Vac.
- **Debris, Sludge Collection / Containment:** HD collection bag with micron filtration contains all types of sludge and slurry waste, — micron sized: contain slurry wastewater while allowing the filtered water to pass through. Bag is 100% reusable, cleanable.
- **Overflow Protection - Can't Be Overfilled:** Built-in pressure sensor automatically stops wastewater extraction when extracting faster than you can discharge. Once the water is low enough in the tank it automatically resumes suction.

### Specifications – 1 Year Warranty:

- Power: 10.0 Amp (vacuum), 4.5 Amp (sump pump)
- Sump Pump - Industrial Grade: fast extraction of wastewater, 40 GPM discharge rate up to 100'
- Power Cord: 12 gauge x 50', 3-Prong Ground Plug
- Suction Performance: 105" H2O, 110 CFM
- Tank: 24 gallon, 20 gallon capacity - Rotational Mold For HD Strength and Durability
- 24" drain hose on the rear of the tank.
- Power Outlet for Sump Pump, 120 volt
- All parts and components are replaceable and available.

### Includes:

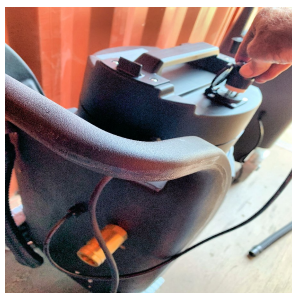

- Complete & Accessory Kit (right): 2-piece wand, 15" squeegee & crevice tool
- 24" convenient drain hose on rear of tank
- 1.5" x 10' crushproof extraction hose
- 1-1/2" x 35' discharge hose with cam-lock fitting for sump pump
- Slurry / Debris Collection Bag, re-useable.

### Auto Pump-Out Operation:

- Fast, high-volume pick-up of spills, flood water and concrete slurry
- Automatic and fast discharge (40 gallons per minute) of extracted wastewater
- 4520P empties itself continuously without stopping the vacuum extraction process.

### 20-Gallon Slurry Pump-Out Vac w/ Optional Squeegee

Model	Description	Price
4520P	20 Gal Slurry Pump-Out Vac - Complete 37" (h) x 24.5" (d) x 24" (w), 82 lbs.	\$1,329.00
4520S	20 Gal Slurry Squeegee (29") Vac Identical to the 4520P but with the 29" squeegee and no sump pump.	\$1,590.00
