Hoses, Cuffs, Filters, Nozzles

Floor Sweeps & Wands

For Shop Vacuums & Silica Dust Extractors

Professional: Eliminate using proprietary connectors & inferior hoses with our universal & superior hoses, screw-cuffs & adapters.

Z-Vac & Extreme Hi-Flex Hose — Proven performer in flexibility, smooth wall interior, crush and abrasion resistant. Two profile construction with a smooth interior and exterior surface to make them excellent at carpet cleaning and the extraction of concrete dust and slurry. Z-Vac is the most versatile hose in the market with premium flexibility to prevent hang-up, glide easily over surfaces, will not mark floors, scrape objects & maximizes airflow.

FACT: Smooth Interior Hose Inferior hoses have corrugations (valleys) inside the hose which causes dust to settle and accumulate. As it accumulates, the hose gets heavy and the passageway narrows which restricts airflow (i.e. CFM), causes motors and circuits to run hot, visible dust increases, maintenance is required, production suffers. For dust and slurry extraction, always select a smooth-bore hose.

Z-Vac Hose: Most versatile & durable hose in the market to maximize airflow with premium flexibility to glide easily over surfaces.

2" x 25'
#ZVAC20025 \$ 87.00

3" x 25'
#ZVAC30025 \$ 97.00

Extreme Hi-Flex: Extremely Lightweight & Flexible A+ for use with smaller dust extractors & wet/dry vacuums.

1-1/2" x 25' Hose
#231578 \$96.25

2" x 25' Hose
#233060 \$137.00

Antistatic Hose: Vacuum Static Discharge is a build-up of electricity when material, such as dust, pellets, wood chips, flour, etc., goes through a vacuum hose and creates a static charge. The charge has the potential to cause a safety hazard for employees and the work environment.

Static Conductive: The most effective and easiest way to dissipate an electrostatic discharge is when conductive carbon black is added to the hose's polymer matrix. Conductive carbon blacks are special branched carbons with a graphitic structure that are able to transport the flow of electrons and dissipate their electrostatic charge. The following two hoses enable the static-charge to travel the entire length of the hose to ensure a grounded, shock-free working environment when using connecting tools and vacuum cleaners. Both types provide end-to-end, complete dissipation of static electricity when properly attached to a grounded vacuum cleaner or vacuums that have been modified to create a grounded solution.

Static Conductive, Lightweight Black - black polyethylene copolymer hose, reinforced with an integral polyethylene helix.

5961250150	1-1/4" x 50'	\$234.00
5961500150	1-1/2" x 50'	\$278.00
5962000150	2" x 50'	\$489.00

Static Conductive, Lightweight Yellow - identical to the above but with a yellow skimcoat to help prevent black scuff marks on surfaces.

5991250250	1-1/4" x 50'	\$220.00
5991500250	1-1/2" x 50'	\$278.00
5992000250	2" x 50'	\$489.00

Screw-Cuffs: Highest, USA Made quality screw-on connectors with a smooth-end. Provides a secure, friction fit to exhaust ports. Universal for all dust, slurry and wet/dry applications.

Thread-On -x- Smooth-End — Made of High Quality, Pliable USA Vinyl.

2" Hose: cuffs thread onto 2" hose, smooth end attaches to dust exhaust ports.

D2020S 298665	2" ID Smooth-End - attaches to dust shrouds with 2" OD. This same cuff fits into the inlet port of most vacuums to use a 2" hose.	\$12.00
D2020SS	2" ID Smooth-End <i>with Swivel</i> ~ identical to the above D2020S cuff with 360° Swivel Connection.	\$18.00
D2015S 226652	1-1/2" ID Smooth-End ~ attaches to dust shrouds with 1.5" OD including Bosch tuck point and many cup wheel dust shrouds.	\$19.00

1-1/2" Hose: cuffs thread onto 1-1/2" hose, smooth end attaches to dust exhaust ports.

D1512S 201071	1-1/4" ID Smooth-End - attaches to dust shrouds with 1-1/4" OD including Dewalt's tuck pointing and surface grinding cup wheel shrouds (i.e. Diamond Vantage blue shroud.)	\$13.00
D1515S 168896	1-1/2" ID Smooth-End ~ attaches to dust shrouds with 1.5" OD including all Bosch tuck point shrouds & Metabo's "clip-on" tuck point shroud. Also used as the inlet cuff for Dewalt's DWV012 vac to use a 1-1/2" hose.	\$9.00
D1520S 194324	2.0" ID Smooth-End ~ attaches to dust dust guards with a 2" OD dust port including our USA Dust Guards (6" and 12") and Metabo's. Also used with our Universal Inlet Cuff (#IC200U) to use 1-1/2" hose, and attaches to existing Fein inlet cuff (w 1-1/4" hose removed) to use 1.5" hose.	\$12.00
D1515T 201055	1-1/2" Dual Threaded-Ends ~ used with the Glitter Bit Dust Controller and to connect two (2) 1-1/2" hoses together.	\$12.00

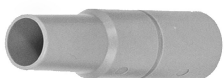

1-1/4 & 1-3/8" Hose: cuffs thread onto 1-1/4 & 1-3/8" hose, smooth end attaches to dust exhaust ports.

	For vacs with a 1-1/4" and 1-3/8" hoses (Bosch, Dewalt, Fein, Hilti) the following cuffs thread onto their hoses.	
D1212S 201071	1-1/4" ID Smooth-End ~ attaches to dust shrouds with 1-1/4" OD including Dewalt's tuck pointing and surface grinding cup wheel shrouds (i.e. Diamond Vantage "blue" cup wheel shroud.)	\$9.00
D1215S 201064	1-1/2" ID Smooth-End ~ attaches to dust shrouds with 1-1/2" OD including all Bosch tuck pointing shrouds.	\$13.00
D1220S 109015	2.0" ID Smooth-End ~ attaches to dust shrouds with 2.0 OD including our USA Dust Guard (6" and 12") and Metabo's tuck point shroud.	\$21.00

Coupler • Universal Adapter

#D-HC | Coupler — Joins a 1.5" or 2" hose together or transits from a 1.5" to 2" hose. Both ends of the coupler are 2.0" OD. **\$29.00**

#119221 | Universal Adapter — 1.5" OD x Taper End. Taper end + unique material securely installs and hold itself into most dust ports including European, Asian, Hilti, Dewalt. Select any 1.5" ID cuff to the adaptor's 1.5" OD. **\$19.00**

Y-Splitter: Operate (2) Dust Shrouds from (1) Dust Extractor.

#YC-1522
\$179.00

- (1) 25' x 1.5" Hi-Flex Hose, #231578 - extremely lightweight and flexible, A+ for use on scaffold. Hose is cut to length.
- (1) Y-Splitter with (3) 2" ID open-ends
- (3) 2" hard cuffs - each installs into the Y-splitter X threaded-end to accept the 1.5" hose
- (3) 2" vinyl hose cuffs - threads onto the (3) 1.5" hose sections X 2" ID smooth-end to attach to exhaust ports on dust shrouds.
- (1) 1.5" x 2' yellow hose section - a hard and vinyl hose cuff threads onto each end of the hose. The hard cuff installs into the Y-Splitter, the vinyl cuff connects to the vac's 2" inlet port.

Floor Sweeps & Nozzles — Industrial / Commercial Grade

PROFESSIONAL — 20" Floor Brush on Wheels with Adjustable Bristles. HD grade, durable aluminum withstands extreme conditions. Easy sliding and impeccable dust and debris removal. 2" locking-collar attaches to the double bend wand, #879133.

Refill Hair Strip, Front and Rear (pair), 19"

2" x 50" Curved, Double-Bend Wand with 2" opening and locking nut, made of aluminum. For use with the 20" Pro Floor Brush, #879130

#879130
\$110.00

Debris Collection Bags: Air Pulse Self-Clean & Longo Pac

Air Pulse Filter Collection Bag

— Best upgrade you can make for any vacuum

“Fits Most Shop Vacs & Dust Extractors”

Stronger, Better Quality, Superior Collection Yields

- Outperforms and *outlasts* any “fleece”, cloth or paper bag 10:1 - maximizes collection yields, decreases bag consumption, will not tear or accidentally burst *even when tossed in a dumpster.*
- OSHA Silica Dust Compliant — Self-Clean, Heavy-Weight Filter Bag. Heavy-weight filter media inflates & deflates, self-cleaning itself when vacuums are turned off and on or during filter cleaning cycle with dust extractors. Dust is effectively released, powerful suction is assured, cartridge filters stay clean.
- Keeps Everything Clean: the outside of the bag, the inside of the tank and the HEPA filter are all kept clean!
- Fits 8 to 17 gallon tanks with a 2.5" OD deflector port (photo, left). Helps prevent fine dust leakage from the tank — *A+ to use to vacuum cold fire place ash.*

#136514

Air Pulse Vac Bag (above), Universal, Fits: Bosch, Dewalt, Dustless, Fein, HEPA Pro & Dust Pro (8 & 13-gal), Hilti (300 CFM), Makita, Milwaukee, Nilfisk, Ridgid, Shop Vac, many others.

\$65.00 / 5 pk **\$575.00 / 50 case**

#122-3228-14

Micro-Fiber, 10-Quart Backpack / TB300 Cyclone (right) — Pre-Filter for HEPA filter. **\$56.00 / 10 pk**

#122-3225-14

HEPA Pro Max, 13-Gal (421 CFM)

\$445.00 / 50 pk

#122-3223-14

HEPA Pro Max, 20-Gal (421 CFM)

\$590.00 / 50 pk

#581H

Micro-Fiber — fits 5-8 gallon vacs with a 2-1/2" OD inlet deflector port (inside tank.) 99.97% filtration efficiency @ 0.3 microns. Fits Bosch, Dewalt, Dustless, Fein, Makita, Shop Vac, others. **\$449.50 / 65 pk**

Longopac, Plastic Bags

PN: 184621

Fits All Longopac Dispensers

\$99.00
4-Ctn Box

- > 72' long continuous liner bag
- > 6 mil thickness
- > One continuous bag makes 25 - 30 individual bags, depending on desired volume you want to fill
- > Easy attachment to any dust collector that uses a Longopac® dispenser
- > 4-count pack/box w/ cable ties.
