

SCANMASKIN 750

Robust and Powerful Floor Grinder for Professional Use

Looking for a reliable and durable floor grinding machine for both small and large-scale projects? The Scanmaskin 750 is an extremely robust and stable floor grinder, built entirely from high-durable steel to withstand tough jobsite conditions and extended use. With a grinding width of 750 mm, this machine is ideal for everything from residential renovations to large commercial floor surfaces. It excels in concrete grinding, floor polishing, and the removal of heavy coatings.

The Scanmaskin 750 is engineered with reinforced bearings, shafts, and drive belts—designed to deliver long service life and minimal downtime. Its patented drive system, featuring a double-sided toothed belt and gear ring, ensures smooth operation and consistent performance, even under demanding conditions.

To reduce vibrations and improve working comfort, the machine is equipped with three cast iron grinding discs (280 mm each), cast in one piece and laser-hardened for extra durability. This design provides a smooth grinding experience and promotes a more ergonomic working posture for the operator.

The handle folds back for easy transport and compact storage. In tight spaces, the machine can be maneuvered using the integrated side handles.

The Scanmaskin 750 also features a convenient water connection for effective wet grinding, increasing flexibility across a wide range of applications.

POWERFUL, EXTREMELY ROBUST AND STABLE GRINDER

GRINDING DISC
PLANETARY

GRINDING WIDTH
750 mm / 29,5"

WEIGHT
372 kg / 820 lbs

TECHNICAL DATA

Art.No.:	575000
Voltage:	3~ 230 Dual Phase / 400-480 V
Motor power:	10 kW / 13 hp
Current:	32 Amp
Frequency:	50-60 Hz
Grinding head speed:	250-1150 rpm

Grinding head:	3 x 280 mm / 3 x 11"
Grinding width:	750 mm / 29,5"
Weight:	372 kg / 820 lbs
Grinding pressure:	280 kg / 620 lbs
Other:	CE-marking
